There is no dearth of large vacant public ground in the close vicinity of town hence suitable ground for play-ground etc. In fact no complaints have at any time reached Govt. that the school children in municipal centres have at any time been deprived of sufficient play ground. Even in regard, there are vacant public ground scattered throughout the city, where school children can almost conveniently for recreation. The proposal now made may be opposed to the city and. etc for depriving proposals may be, as the proposal has the merit of organising on a [illegible] which is being enjoyed in a more or less unorganised manner. The need for such recreation grounds in the Bangalore city is no doubt great.

Sir,

I am directed to forward herewith copy of a note by the Superintendent of the Chamarajendra - - Technical Institute, Mysore on the necessity of providing public recreation grounds for children, and to state that it was considered by the Education Committee at their meeting on the 9th of August 1919 when it was resolved that

"it is highly necessary to provide in all Municipal areas recreation grounds of the kind proposed and that there should be one such in every Mohalla in large towns and that necessary provision should always be made in the new extensions for the purpose".

I am accordingly to request that Government may be pleased to pass suitable orders in the matter for the necessary action being taken by the authorities concerned

NECESSITY OF A CHILDREN'S PUBLIC RECREATION GROUND.

With the great improvements in Education and the progress of knowledge in the state it appears very necessary also to make some provision for the development of the physique by an efficient recreation ground. In fact recreation is a most necessary auxilliary to Education which must lose much of the vital powers of assimilation, retention and application without the freshness, and regeneration of the mental powers, which can be obtained only through congenial bodily exercise and diversion in the open air.

Most schools in Mysore city have no compound of sufficient size or afford any facilities as a playground. The ground recently used in the Government House Compound is now closed and the oval by the Public Offices is taken for the use of the University. The ground around the tank by Krishna Rice Mill does not seem finally disposed of as yet and would not be too large and is centrally central. There is also ground between the Railway Station and Wesleyan Mission Hostel if the compound of the Public Offices is not available

During the present impetus in Town Planning, it is expedient that our city fathers bring this important matter to an early conclusion as land daily grows more expensive and possible sites restricted.

The ground should obviously be central and sufficiently large in size to provide space for the city children. Facilities must also be given for all games and for this purpose the ground may be divided into parts for footer, cricket, baseball, badmington, round games, ball games, giant strides, swings, horizantal bars and poles with rands and a grass court for very young children.

THE NEED OF A WELL-PLANNED PLAYGROUND IN EACH UNIT

With the great improvements in education and other programmes relating to the state it appears very necessary also to make some provision for the development of the physique by an efficient recreation ground. The first recreation is a most necessary auxiliary to the education which must lose much of the vital power of assimilation, retention and application if without the freshness, and regeneration of the mental powers, which can be obtained only through congenial bodily exercise and diversion in the open air.

Most schools in Lyons city have no compound of sufficient size or afford any facilities as a playground. The ground recently used in the Government House compound of 15 now closed and the oval by the Public Offices is taken for the use of the University. The ground around the tank by Krishna Mess will not once finally disposed of or yet and could not be too large and is central. There is also ground between the Railway station and Reclyan Women Hospital if the compound of the Public Offices is not available.

During the present impetus in town planning it is expedient that our city fathers bring this important matter to an early conclusion as land daily grow more expensive and possible sites restricted.

The ground should obviously be central and sufficiently large to also be provide space for the city children. Facilities must also be given for all games and for this purpose the ground may be divided into parts for Tennis, Cricket, Baseball, Swimming Round Cross, Ball Games, Giant Strides, Swings, Horizontal Bars and Slides with sands and a grass court for very young children.

The central grass oval might be surrounded by a running track and this in turn by shrubberies, trees, reserves and

gardens artistically laid out with shelters and such comfort which could be arranged in the form of terraces.

At least one drinking and bathing fountain and basin should be provided, as bandstand would greatly add to the attractiveness but is not real necessity.

One or frequently several of such "Rec." are established in all European cities and are considered a very necessary institution in connection with the development of child life and education and the great race of the Greeks at the dawn of culture made this a very important feature, with their garden schools and Olympian Games.

The children of to-day are the nation of tomorrow and no possibilities for their physical or mental development can be lightly laid aside in view of the increasingly strenuous struggle for existence. Darwin's impersonal axiom of yesterday "the survival of the fittest" being continued to-day by the curt and directly personal phrase " Keep fit or go under".

It is earnestly requested that some immediate means may be provided to meet the very urgent needs of Mysore city schools.

By Rev. Alderton,
Supt. Chamarajendra Technical Institute, Mysore.
